**NOVENCO AirBox™**

Available on our website  
as a free download.

Pure competence in air.

The world's most efficient fan  
now fully certified to EN 12101-3:2015

## ZERAX® SMOKE FAN + VSD

# Reliable. Efficient. Silent.

Fully certified variable speed smoke fan + VSD package solution.

ZERAX® AZN HT  
Axial powered smoke fans  
for duct connections.

ZERAX® AZL HT  
Axial powered smoke fans  
with free inlet.

ZERAX® AZT HT  
Smoke jet fans for car  
parks and service yards.

**The EN 12101-3:2015 allows the use of variable speed controlled smoke fans in the event of a fire. For that purpose, the smoke fan and variable speed drive package must be high temperature tested and certified by an independent notified body.**

The complete range of NOVENCO ZerAx® HT fans has been tested and certified as smoke fans in combination with Danfoss VLT® drives by the MPA in Braunschweig, Germany.

### Innovation as a core competence.

The innovative design of the NOVENCO ZerAx® range of axial flow fans is aimed at reducing power consumption. It is the most energy-efficient fan on the market today, with corresponding low sound levels. With the certified ZerAx® HT + VSD package, these benefits are also available for dual purpose and smoke fan operation.
