

Over 70 years experience

## VENTILATION AND SMOKE CONTROL

for car parks, tunnels and safe escape routes

Pure competence in air.

EN 12101-3:2015  
**certified**  
WITH VSD

Certified smoke control systems for safe escape routes, tunnels and car parks

## NOVENCO LIFE SAFETY SYSTEMS

## Innovative. Sustainable. Reliable. Safe.

NOVENCO life safety systems for safe escape routes.

Certified by KIWA/NCP as an Approved Smoke Control Company.

Design and installation of SHEVS and pressure differential systems.

Speed-controlled smoke fans in accordance with EN 12101-3:2015.

**Buildings are becoming more complex and the associated risks are increasing. In the unlikely event of fire or other emergency, it is crucial that occupants, personnel and visitors can escape from the building safely. Reliable smoke control systems are essential for safe and secure escape routes.**

As a KIWA/NCP accredited smoke control company, NOVENCO Building & Industry offers a complete package for the design, supply, installation and maintenance of certified smoke control installations.

### Innovation as a core competence.

NOVENCO is committed to innovation. Our ZerAx® fan is the most energy-efficient in the world. In addition, the ZerAx® HT has been tested and certified as a variable speed smoke and heat exhaust fan with the corresponding frequency converter at high temperatures in accordance with the latest product standards.

Through years of experience and acquired knowledge in this field, NOVENCO can deliver reliable and sustainable customised solutions for any building.
